Edition 04/2015

## Flat power supply in LOGO! 8 design for distribution boards

**Our miniature power supply units in the LOGO! 8 design offer great performance in the smallest space. Thanks to various output voltages, high functionality and comprehensive certifications, they are suitable for highly versatile implementation in numerous applications in the lower performance range.**

The excellent efficiency over the complete load range and the low power loss during idle times guarantee efficient operation. The wide-range input for connection to networks with alternating or direct voltage, the wide operating temperature range, as well as the power reserve for starting up capacitive loads makes them suitable for universal use. These reliable power supplies with their flat, stepped profile are extremely suitable for applications with low mounting depths, such as in distribution boards, for example.

To further increase the 24 V availability, LOGO!Power power supplies can be combined with DC UPS, redundancy and selectivity modules.

You can find the appropriate power supply quickly and easily with the SITOP Selection Tool.

### The benefits at a glance

- 3 performance classes up to 4 A for 24 V DC, 2 performance classes for 5, 12 and 15 V DC
- Flat LOGO! 8 design with just 55 mm installation depth
- 1-phase wide-range input from 85 to 264 V AC or 110 to 300 V DC
- High efficiency across the entire load range, low load losses while in standby
- Constant current for connection of loads with high inrush current
- Power reserve on starting up through 1.5 times the rated current for capacitive loads
- Adjustable output voltage
- Green LED for "Output voltage OK"
- Temperature range from -20 °C to +70 °C
- Comprehensive certification e.g. UL approval, for semiconductor industry, explosion protection and ship building

Technical data	LOGO!Power 5 V		LOGO!Power 12 V
